

BURNLEY Locality CCG Update – October 2017

Development of the Burnley Health and Wellbeing Partnership

The inaugural meeting of the Burnley health and wellbeing partnership took place on 10th October, with a view to working closer together to improve long term health outcomes for the population of Burnley and to deliver a more prosperous, resilient Burnley.

This first meeting was mainly to identify the purpose, shared priority areas and work towards an agreed plan with all partners. The meeting was very well attended with representation from Burnley Borough Council, Burnley Leisure Trust, Burnley FC in the Community, Blessed Trinity RC College, BPR CVS, East Lancashire Clinical Commissioning Group, Lancashire County Council Public Health, Lancashire Care Foundation NHS Trust and East Lancashire Hospitals NHS Trust.

All representatives were asked to submit what they considered to be their organisation's top three priority areas and these were discussed in detail amongst the group. The group agreed that the top 3 priority areas would be collated and shared with the group, with a focus on key outcomes and timescales for delivery of any projects over the next twelve months. The group agreed to meet quarterly, the next meeting to be scheduled for mid January 2018.

Well North & Well Burnley Wood

Continuing the Well North work in Burnley Wood, in particular working on the three main principles behind this project to:

- Address inequality by improving the health of the poorest, fastest;
- Increase resourcefulness at individual, household and community levels; and
- Reduce levels of worklessness

A workshop was held at Burnley Wood Community Centre on 11th October, with the Well North Team (Lord Andrew Mawson, Sam Tunney, Lucinda McArthur) to hear about what has happened successfully in other areas and if that approach could be applied in Burnley Wood, in particular working with what is available in the area (i.e. residents, small businesses, schools, church etc....) to form partnerships and make it about actions to maximise impact for that area.

Three important questions to consider are:

- What do the community want?
- What has been learned from other areas?
- How can this group of people make a difference in their community?

A two day immersion event is planned for the end of October to really start to come together to agree how we can take this exciting project forward.

Primary Care Networks

Three Primary Care Networks (PCNs) have been established in the Burnley locality, based on the existing geographical footprint of the three integrated neighbourhood teams (Central, East and West).

Primary Care Networks (PCN) are collaborations between primary care providers (including community care, general practice, social care, the voluntary sector and others). They provide a population-based model of care to a local population of 30,000 – 50,000 people based on the registered list of the participating GP practices. Partners develop a multidisciplinary team approach to delivering personalised, holistic care based on the individual's needs rather than disease types.

PCNs are about creating an integrated model of care that works for their local population needs.

The benefits of the three PCNs will be to create joined up services for patients, a stronger more resilient general practice with increased investment.

Two important showcase events are coming up, on 24th October (which is a Lancashire wide event) and a local event on 15th November, which will allow the three PCNs to come together to discuss how we progress the development of the agreed theme 'access' but get into some of the detail about the particular elements underneath that 'access' banner, i.e. patient education, mental health access, self care/navigation, care homes & access to GPs/primary care services etc..
